

Worker Information Release Consent

Worker Information Release Consent cannot be used for workers who fall under the Queensland Coal Mine Workers' Health Scheme. Results for these workers must be obtained either from the original referring Examining Medical Officer or from the [RSHQ Res Health website](#).

Alternatively, any worker can access their own results via the [Lungscreen Portal](#). For assistance, please email info@lungscreen.com or call 07 5376 3333.

All Health Practitioners are legally and ethically bound to ensure worker health information is treated as confidential and comply with the [Privacy Act 1988](#). However, to ensure workers receive optimal clinical care Health Practitioners often need to share records.

By signing this Worker Information Release Consent the worker gives the organisation listed below permission to access results via the Lungscreen Portal.

Requesting Practice
